

zMonthly October 24

Central banks boost markets

The escalation in the Middle East weighed on global stock markets at the beginning of the month. Only the Chinese market continued its upward trend. However, this did not last long as investors were disappointed by the lack of details on planned stimulus measures. In the US, inflation figures for September were slightly higher than expected. Markets took it in their stride that further aggressive rate cuts of 50 basis points were likely off the table. As expected, the European Central Bank cut its key interest rate by a further 0.25%. Falling inflation is giving the ECB the leeway it needs to help the faltering economy get back on its feet. Positive impulses from the US reporting season ensured a buoyant stock market environment, with some indices reaching new all-time highs. In Switzerland, sentiment was more subdued in the light of quarterly figures. Many companies complained about sluggish demand and continued destocking by customers. Novartis beat market expectations with its third-quarter results and slightly raised its outlook. Nevertheless, the share price came under pressure. Sonova shares jumped on the news that some Costco stores - an important distribution channel in the US - had resumed selling Sonova hearing aids. U-Blox issued a disappointing outlook for the fourth quarter due to weak demand in the automotive sector. The strategic review of the loss-making Connect division is ongoing. Tecan issued its second profit warning within a few months, which weighed heavily on the share price of the laboratory equipment supplier. The Fund lost 4.1% in October.

Significant reduction in Tecan

During the month, we continued to add to our position in Huber+Suhner. In contrast, we took profits in Sonova and significantly reduced our position in Tecan.

US elections and economic environment create uncertainty

Surprisingly, the US election has had little impact on equity markets until recently. Since August, the S&P 500 index has risen steadily, outperforming the average for election years by around 10%. Although the outcome of the election is still up in the air, markets now seem to be pricing in a decision in favour of Donald Trump. This could lead to higher corporate profits, rising inflation, lower taxes and higher government debt. As a result, 10-year Treasury rates jumped 60 basis points, and gold as well as bitcoin hit new highs. However, the threat of import tariffs is a bad scenario for the rest of the world, including Switzerland. America is Switzerland's most important export market, ahead of Germany. Led by the automotive industry, the global economy has continued to cool over the past two months. This will not fail to leave its mark on Swiss companies.

9	Swisscom	3.1%
10	Swiss Re	3.1%

Investment Strategy

The zCapital Swiss ESG Fund invests in Swiss equities which zCapital believes qualify as sustainable companies and have an attractive risk and return profile. The fund's assets are invested in a concentrated portfolio of 25 to 35 stocks from the SPI (Swiss Performance Index) universe. In addition to ESG integration, companies which violate social and environmental criteria are excluded. The sustainability of companies is also promoted through engagement and voting. zCapital invests with a long-term horizon and pursues an active selection process.

Impact of zCapital

zCapital plants each year 100 trees for every million Swiss francs of assets under management in the zCapital Swiss ESG Fund. In cooperation with myclimate, it is ensured that the trees are cared for in the long term. The project combines nature and climate protection with the creation of new sources of income for small farmers.
